Associate Degree in Public Health (OEPH)

Course Check List

In addition to the general education courses, it would be BEST for the students if the core classes were taken in the following order:

Begin with: HLS 100, CHSS 101, HLS 150

Progress to: CHSS 216, HLS 275

End with: HLS 295, CHSS 299

It is essential that CHSS 299 be taken in the last semester before graduation, after the student has taken the majority of the CORE classes as this class is a Capstone Course for the Associate degree based on the core curriculum.
